Investing has never been so simple

The Doge Whisperer

The dog coins are out of control, the meme market is full of rug pulls and scams. Only one man can bring order to the chaos.

Making money in DeFi should be an easy process, all it takes is trust between a project and its community.

Get ready for 100% fair, open and transparent investing that means WAGMI, and you can Ape Safe knowing your investment is Safu.

👉 8. Roadmap

1. Project Overview

Whilst there are very legitimate DOG and MEME tokens on the market, it is also filled with less than reputable ones whose only goal is to extract value from their communities. Greed runs wild and false promises leave a trail of broken investors along the way.

The Doge whisperers are here to change this, and it all starts with our zero team token fair launch Market Generation Event.

No stealth launch here so our buddies can buy all the cheap tokens and dump all over the community. no special deals with callers who can do the same. The is DeFi done properly, Strong liquidity and an even start for everybody is our main focus.

Then the marketing can grow the investments of all community members and we will have built strong foundations to ensure we can keep delivering value for the earliest investors, and those who join us along the way.

2. Safety First

The most important part of any project in our opinion is full transparency with the investors.This ensures they can invest with 100% confidence.

To this end The Doge Whisperers make the following commitments. 100% of the funds raised from the fair launch will be added to liquidity. This liquidity will be locked indefinitely.

The keys for the LP wallet will be destroyed to make sure of this. All Vault wallet Addresses will be made public so the community can see exactly how the funds in them are being used and know the team cannot simply take the funds.

Token contract will be audited and fully public so the community can review and be sure we cannot execute any functions that would allow us to harm our community. The Doge whisperers are here to stay, and our community is the most important thing to us.

3. Fair launch/Tokenomics

In order to ensure we all start on an equal footing we will launch our token via a fair launch. The fair launch event will last for seven days. Each day will have a set amount of tokens and users can pledge any amount of ETH each day with no limits.

We want our launch to be 100% fair but also with an element of game theory to make it fun for the community to participate. The launch method will ensure whales are not able to gain any unfair early advantages and Bots can not front run the TGE.

Token Supply: 900,000,000,000. Each Day will be assigned a set number of tokens.

Day 1   👉   56,250,000,000

Day 2   👉   56,250,000,000

Day 3   👉   56,250,000,000

Day 4   👉   75,000,000,000

Day 5   👉   93,750,000,000

Day 6   👉   112,500,000,000

Day 7   👉   150,000,000,000

- All funds raised from this event will be added to the liquidity with 300,000,000,000 $TSST tokens.
- No more tokens will ever be minted and the supply of 900,000,000,000 will be deflationary due to burns.

4. Tax Distibution

$TSST will have a built in 10% Tax on all Buys and Sells.

The distribution of this tax will be:

👉 3% To the WAGMI Vault

👉 2% To the Burn Baby Burn Vault. *(All funds in this vault will be used to buy back and burn $TSST)*

👉 2% To the Safe Ape Vault

👉 3% To the DEV/Team Fund

As you can see 70% of the token tax will go directly back to the community. The 3% DEV/Marketing Fee will enable our team to run the project with a minimum amount of value extracted.

Our team will have 100% self funded the project and will hold ZERO team tokens. Our team will have to enter the sale rounds the same as everybody else.

5. Wagmi Vault

This vault serves two simple purposes to ensure every member of the Doge Whisperer crew can make it:

👉 1. Marketing, Marketing & Marketing!

Ensuring marketing is kept constant so there is always as many eyes on the project as possible. This ensures consistent value for every investor old or new.

👉 2. Community Lottery/Giveaways 'Give the value back'

This is the very mantra of the Doge Whisperers. The community lottery will be a set prize pool and each time that amount is reached it will be distributed randomly amongst our holders. There will be a minimum required holding to qualify for the lottery.

Why should projects only reward their communities when it suits them? We will have constant leader boards and prizes to reward community engagement as well as giveaways for simply being a part of the Doge Whisper Crew!

6. Safe Ape Vault

Rug pulls and scams are becoming far too common these days. But it is also harder to distinguish which token could be the next 100x, which is why many take the risks in the first place.

Well the Doge Whisperer Crew thinks there should be a risk free way to ape and make degen moves. This is where our safe ape vault comes into play. The community will be able to put forward new projects along with those the Doge Whisperers will seek and the funds from the vault can be used to buy early into these projects. Users can then support this ape play by staking their $TSST tokens.

After a set amount of time or a set target is reached, the tokens obtained from the buy in will be distributed as rewards. However, should the project Rug, scam or just perform badly, you can claim your $TSST tokens back with no losses incurred.

Why risk your own funds, when the Doge Whisperer Crew can take the risks for you?

7. Building Bridges

The $TSST token will initially be launched on the Ethereum network. We as a team are fully aware that some feel the TX fees here can be a barrier to entry, but we also feel Ethereum is still the OG network in the game for projects like ours.

However our intention will be to release subsequent versions of the token on as many L1 or other network solutions our community would like to see us on.

We will then ensure development of bridges meaning users can send their tokens to and from any network they desire as easy as possible. Liquidity for these launches will be generated from the WAGMI vault.

Roadmap

Phase One

✔ Launch Social Media & Telegram

✔ Marketing, marketing & Marketing

Phase Two

Initiate the WAGMI Vault ✔

CoinGecko & CoinMarketCap Listings ✔

Develop & launch the Safe Ape contracts ✔

Phase Three

✔ Begin Deployment to chosen network solutions

✔ Develop the bridges

Phase Four

You would't believe us even if we told you..

😉
